EDUCATION

University of Maryland, College Park, MD (GPA:3.54)

Expected Graduation: December 2026

Bachelor of Science in Computer Science, Minor in General Business

- Merit Scholarship, Dean's Honors List
- Academic Excellence Award Recipient

Relevant Coursework: Human-Computer Interaction, Product Design (Figma), Product Management, Ethics in AI, Privacy Engineering, Database Design, Web Development, Computer Systems, Principles of Management

SKILLS

- Certifications: Aha! Product Management Professional Certificate, Pendo, Power BI, Intro to Artificial Intelligence (AI)
- Product: Figma, Pendo, Jira, Miro, Confluence, User Research, Product Analytics, KPI Development, Roadmapping
- Technical: SQL, Python, HTML/CSS, JavaScript, MongoDB, Java, Drupal, React, Git

WORK EXPERIENCE

FINRA

June 2026-Current

Product Management Intern

- **Validated** FINRA's AI-powered Compliance Screener against industry feedback: distilled **93** complaints from **50+** comment letters into 17 prioritized **user pain points**, **scoring product coverage** to pinpoint the **highest impact gap** and author its **feature brief**.
- **Proposed 3 future opportunities**, each **mapped** to a documented **user pain point** and its **key dependency**, to **guide** the **product's longer-term direction**.
- **Designed** a **7-KPI measurement framework** and **Go/No-Go decision matrix** for the product's feasibility gate with **success targets, decision triggers, baselines** and **automation plans** to **track post-launch performance**.
- **Owned** customer feedback-driven product discovery for FINRA's regulatory filing platform by analyzing **192 CSAT survey responses**, prioritizing **15 platform improvements** using impact-versus-effort analysis, and delivering leadership recommendations projected to improve customer satisfaction by **6-10 percentage points**.
- **Won** FINRA's company-wide Creatathon by designing a gamified blockchain learning platform, iterating on comparative **usability studies** and **user feedback**; solution now being evaluated for **broader internal adoption**.
- Conducted onboarding and adoption analysis for an **AI developer-tooling pilot**, identifying and prioritizing **13 bottlenecks** across three developer toolchains and proposing **product enhancements** to improve usability.

Maryland Robotics Center

August 2025-Current

Web Assistant

- **Designed** and **deployed** new **Drupal** and **HTML** pages improving navigation and accessibility for **1,000+** users.
- **Translated content requirements** from faculty and research teams **into site updates**, and **coordinated** budgets, timelines, and delivery end to end.

University of Maryland

August 2024-January 2025

IT Worker

- **Resolved 150+ Jira** service tickets supporting software and hardware issues for university staff.
- Managed inventory **database** for 300+ devices, reducing asset discrepancies **30%** through systematic audits.
- **Configured** and **deployed 150+** devices across Windows, macOS, and Linux platforms.
- Provided **technical support** for AV installations in 20+ rooms with a **25%** increase in setup efficiency.

PROJECTS

TerpFinance

January 2026-March 2026

- **Led** a team in building a personal finance platform for college students from product discovery through **MVP** delivery.
- Conducted **customer interviews** and **user research**, and translated customer insights into personas, **user stories**, **product requirements**, and **feature prioritization**.
- **Designed wireframes, prototypes, and UI mockups in Figma**, iterating based on **user and stakeholder feedback**.
- Collaborated on implementing budgeting, transaction management, and financial analytics features for the product.
