EDUCATION

University of Maryland, College Park, MD

Expected Graduation: December 2026

Bachelor of Science in Computer Science, Minor in General Business

- Merit Scholarship, Dean's Honors List, Academic Excellence Award Recipient

Relevant Coursework: Human-Computer Interaction, Product Management, Product Design, Ethics in AI, Privacy Engineering

WORK EXPERIENCE

Hack4Impact-UMD

August 2026-Present

Product Manager

- Lead product strategy and delivery as **sole PM** for a **15-person cross-functional team** of engineers, tech leads, and designers building custom software for Sustainable Saratoga, an environmental nonprofit.
- Translate stakeholder needs into a **Product Requirements Document (PRD)**, defining **MVP scope**, prioritizing core features, mapping end-to-end user flows, and writing user stories with acceptance criteria.
- Manage a roadmap spanning **14 weekly Agile sprints** using Kanban, aligning design and engineering on technical feasibility, resolving blockers, and managing scope to support **on-time MVP delivery**.

FINRA

June 2026-August 2026

Product Manager Intern

- Analyzed 50+ public comment letters for an internal AI compliance-review tool, distilling **93 complaints into 17 pain points**; scored tool coverage, wrote a feature brief for the top gap, and proposed **3 roadmap opportunities**.
- Designed a **7-KPI measurement framework** and **Go/No-Go decision matrix** for the product's feasibility gate with success targets, decision triggers, baselines and automation plans to track post-launch performance.
- Led customer feedback-driven product discovery for FINRA's regulatory filing platform by analyzing **192 CSAT survey responses**, prioritizing **15 platform improvements** using impact-versus-effort analysis, and presenting leadership recommendations projected to improve customer satisfaction by **6-10 percentage points**.
- Conducted onboarding and adoption analysis for an AI developer-tooling pilot, identifying and prioritizing **13 bottlenecks** across three developer toolchains and proposing product enhancements to improve usability.
- **Won FINRA's company-wide Creatathon** by designing a gamified blockchain learning platform, iterating on comparative usability studies and user feedback; solution advanced to evaluation for broader internal adoption.

Maryland Robotics Center

August 2025-June 2026

Web Assistant

- Designed and deployed Drupal and HTML pages for 1,000+ users, incorporating faculty and research-team feedback to improve navigation, accessibility, and content discoverability.

PROJECTS

TerpFinance

January 2026-March 2026

- Led a team of 4 building a personal finance platform for college students from discovery through MVP delivery.
- Conducted **12 customer interviews** and user research, turning insights into personas, user stories, product requirements, and feature priorities.
- **Designed wireframes, prototypes**, and UI mockups in **Figma**, iterating based on user and stakeholder feedback.
- Collaborated with developers to translate product requirements into budgeting, transaction management, and financial analytics features, balancing user needs, technical constraints, and MVP priorities.

SKILLS

- Certifications: Aha! Product Management Professional Certificate, Pendo, Power BI, Agile Foundations
- Product: Product Requirements Documents (PRDs), Product Roadmapping, User Flows, Acceptance Criteria, Agile, Kanban, Sprint Planning, Stakeholder Management, Project Management, KPI Development, Product Analytics
- Tools: Figma, Jira, Confluence, Notion, Miro, Pendo
- Technical: SQL, Python, JavaScript, React, Node.js, Express, MongoDB, Java, HTML/CSS, Drupal, Git
- AI: AI Workflow Automation, Prompt Engineering, Kiro, AI Product Management
