WORK EXPERIENCE

FINRA

June 2026-Current

Product Management Intern

- **Led** product validation for FINRA's **AI-powered Compliance Screener** by analyzing **50+ regulatory comment letters** to identify **17 customer pain points**, mapping them to product use cases, and authoring a **product feature brief** with success metrics and **roadmap recommendations** for the highest-impact product opportunity.
- Designed a **7-KPI measurement framework** with success targets, decision triggers, and automation plans to track post-launch performance, projecting **\$600,000 in annual ROI** and a **20% reduction in review turnaround time**.
- Owned customer feedback-driven product discovery for FINRA's regulatory filing platform by analyzing **192 CSAT survey responses**, prioritizing **15 platform improvements** using impact-versus-effort analysis, and delivering leadership recommendations projected to improve customer satisfaction by **6-10 percentage points**.
- Won FINRA's company-wide Creatathon by designing a gamified blockchain learning platform, conducting comparative usability studies, and iterating on quantitative and qualitative user feedback; solution is being evaluated for potential **enterprise-wide adoption**.
- Conducted onboarding and adoption analysis for FINRA's **AI developer-tooling pilot**, identifying and prioritizing **13 bottlenecks** across three developer toolchains and proposing **product enhancements** to improve usability.

Maryland Robotics Center

August 2025-Current

Web Assistant

- **Designed** and **deployed** new **Drupal** and **HTML** pages improving navigation, accessibility and content discoverability for **1,000+** users.
- **Managed** project operations including budgets, timelines, and stakeholder communication.

University of Maryland

August 2024-January 2025

IT Worker

- **Resolved 150+** **Jira** service tickets supporting software and hardware issues for university staff.
- Managed an inventory **database** for 300+ computing equipment, reducing asset discrepancies by **30%** through systematic tracking and regular audits.
- **Configured** and **deployed 150+** devices across Windows, macOS, and Linux platforms.
- Provided **technical support** for AV installations in 20+ rooms with a **25%** increase in setup efficiency using **Jira** for real-time request tracking.

PROJECTS

TerpFinance

January 2026-March 2026

- Led a team in building a personal finance platform for college students from product discovery through **MVP** delivery.
- Conducted **customer interviews** and **user research**, and translated customer insights into personas, **user stories**, **product requirements**, and **feature prioritization**.
- Designed **wireframes**, **prototypes**, and **UI mockups in Figma**, iterating based on **user and stakeholder feedback**.
- Collaborated on implementing budgeting, transaction management, and financial analytics features for the product.
